3000	840	520	140 X 55	35

PRODUCT OVERVIEW

Improved design to the FA809, with features preventing common damage to the lifting hook. The FA810 is a quick and easy method of converting a fork lift truck into a mobile crane. The FA810 has the extra benefit of a hook that can swivel forwards and backwards allowing the tilt of the forklift to be adjusted without placing undue stress on the hook. Supplied with heel pins to secure behind the forks to prevent slipping.

Made to Measure items can be manufactured for different
