

Designed for crane lifting of brick packs and pallets, with adjustable forks. These forks have the advantage of a spring loaded lifting eye which automatically adjusts to compensate for the different weights carried. This ensures that the crane fork stays level, both when empty or full. Fitted with frame to allow attachment of a safety net.

Cap.	Fork Length	Fork width	Load height	Wt.
2000kg	1000mm	360-380mm	1100mm	200kg
