

The Master Clad vacuum cladding lifter is suitable for the lifting and installation of a range of wall and roof cladding panels with varying length and shape. It can handle flat, micro rib or trapezoidal panels using adjustable vacuum pads to suit your requirements.

With a capacity of up to 400kg and an extended length of 6.5m, longer panels can be handled with ease. The master Clad features a tilt mechanism and rotating system to safely move panels from horizontal to the vertical position.

- ✓ Suitable for wall and roof panels
- ✓ Radio remote control as standard.
- ✓ Dual vacuum circuit
